► CAC- Fan motor driver

Single Phase

Three phase

Features:

- 1, Modbus communication protocol, dip to select the address, Isolation 485 communication, safe and reliable;
2. 180 degree sine wave proper amount algorithm;
- 3, can be downwind or upwind start;
4. Module temperature protection;
5. Module packaging is compatible with multiple specifications and models;
- 6, integrated filter board, capacitor board, frequency conversion module board, Reduce the wiring of the whole machine and simplify the installation process of the whole machine;

	2.5KW	3KW
Input voltage	Single phase 165VAC-265VAC	Three phase 380VAC
Max output Current	15A	10A
Construction	Separate driver	Separate driver
Compressor carrier frequency	5K	5K
Control method	space vector algorithms	space vector algorithms
PFC Carrier frequency	Passive solutions	Passive solutions
RS485	1	1
Dip switch	4	4
